THE REVOLUTION OF LITHIUM
THE FUTURE DYNAMICS OF
CRYPTOCURRENCIES

LITHERIUM

LITHERIUM WHITEPAPER

ABSTRACT

Litherium is creating a currency model that subverts the world, allowing small-capital investors to subvert the traditional asset investment in the rising lithium concentrate. Investors do not need to bear the risks and technical issues of traditional futures assets such as holding, transfer, trading, storage, etc., and only need to invest in Litherium to complete the equivalent investment in new energy consumable lithium concentrate.

COMPETITIVE EDGE OF LITHERIUM

- Expert Team: An accomplished team comprising of an attorney, a PhD in finance, certified geologists, a Swiss fund officer, accountants, ex. ASIC scientific adjunct member of Australia Securities & Investment Commissioner and International Strategy Consultants.
- Lithium derivative: Lithium derivative, based by the advantages of blockchain and cryptocurrency.
- Network: Strong network with local authorities (in Western Australia & China) and exploration partners (WA) established over decades.
- Corporate structure: Registration with Australia Securities & Investment Commission (ASIC), full and transparent audit on use of funds collected.
- Audited: All collected funds being invested in the project and such is audited
- Vote on priorities for our future: Our Investment Token Offering (ITO) is our governance token granting voting rights for our project priorities.
- Building a better future: Litherium Group is here to build a better future, by investing in the Litherium token you are becoming part of the movement, and helping to bring a better tomorrow, today.

WA LITHIUM EXCAVATION PLAN

LITHERIUM

LITHIUM & LITHERIUM

Our projections show approximately 150,000 metric tons of lithium mined yearly. We anticipate that the mine will be running for approximately 30 years. We will mint 100 Million tokens and release 20 Million tokens during the seed fund stage.

→

INTRODUCTION

IT'S THE WAR OVER "WHITE PETROLEUM", NOT OIL OR GAS, WHICH WILL DOMINATE THE NEXT DECADES.

WHO WE ARE – WHAT WE DO

We are a group of Asian-Pacific region-based experts in several fields including finance/law/corporate governance/crypto technology and are creating business and investment opportunities around the globe. We invested our funds into the initial setup of Litherium, as we only promote investments into - and raise funds for projects we believe in and prove to do so.

INVESTMENT CASE – WHY LITHIUM

Lithium is the most important metal of the 21st century. To scientists, it is among the most fascinating elements, and it has also become an essential commodity for a growing number of industries, the most predominant being the automotive industry. The demand for lithium is rapidly increasing - producers, miners, and companies that rely on the supply of lithium, are searching for new sources. Present trends suggest that the demand for lithium will exponentially grow over the next 10–20 years. Global lithium demand (now 200,000 tons per year) could increase 3 to 5 times by 2030.

FINANCING – BLOCKCHAIN MEETS LITHIUM

We will be a significant player in this highly attractive market and become an essential part of the growing demand. At the same time, we will bring a token to the market that will have an actual intrinsic value. We will capture the entire supply chain from financing to mining to the distribution of lithium. The setup of such an operation takes approximately two years and is subject to significant amounts of financing or extracting and refining the lithium. The inability to access traditional funding streams has delayed the development and growth of this sector. On the other hand, the growing demand for lithium and the lack of financing is creating an excellent opportunity for new projects such as Litherium.

Lithium Prospecting License

We will built a team of experts and founded the company “Litherium Australia Mining Pty Ltd” based in Western Australia. Our team will secured the largest lithium property of any company in Western Australia, and applied for the legal right to prospect and mine lithium ore in Australia in July 2021. We have set our target on the land west of the town of Geraldton in Western Australia. Additionally, 3,200,000 hectares are already owned by Litherium Australia Mining Pth Ltd, a 100 % subsidiary of Litherium Mining. Our projections indicate a mining capacity of 150,000 metric tons of lithium per annum.

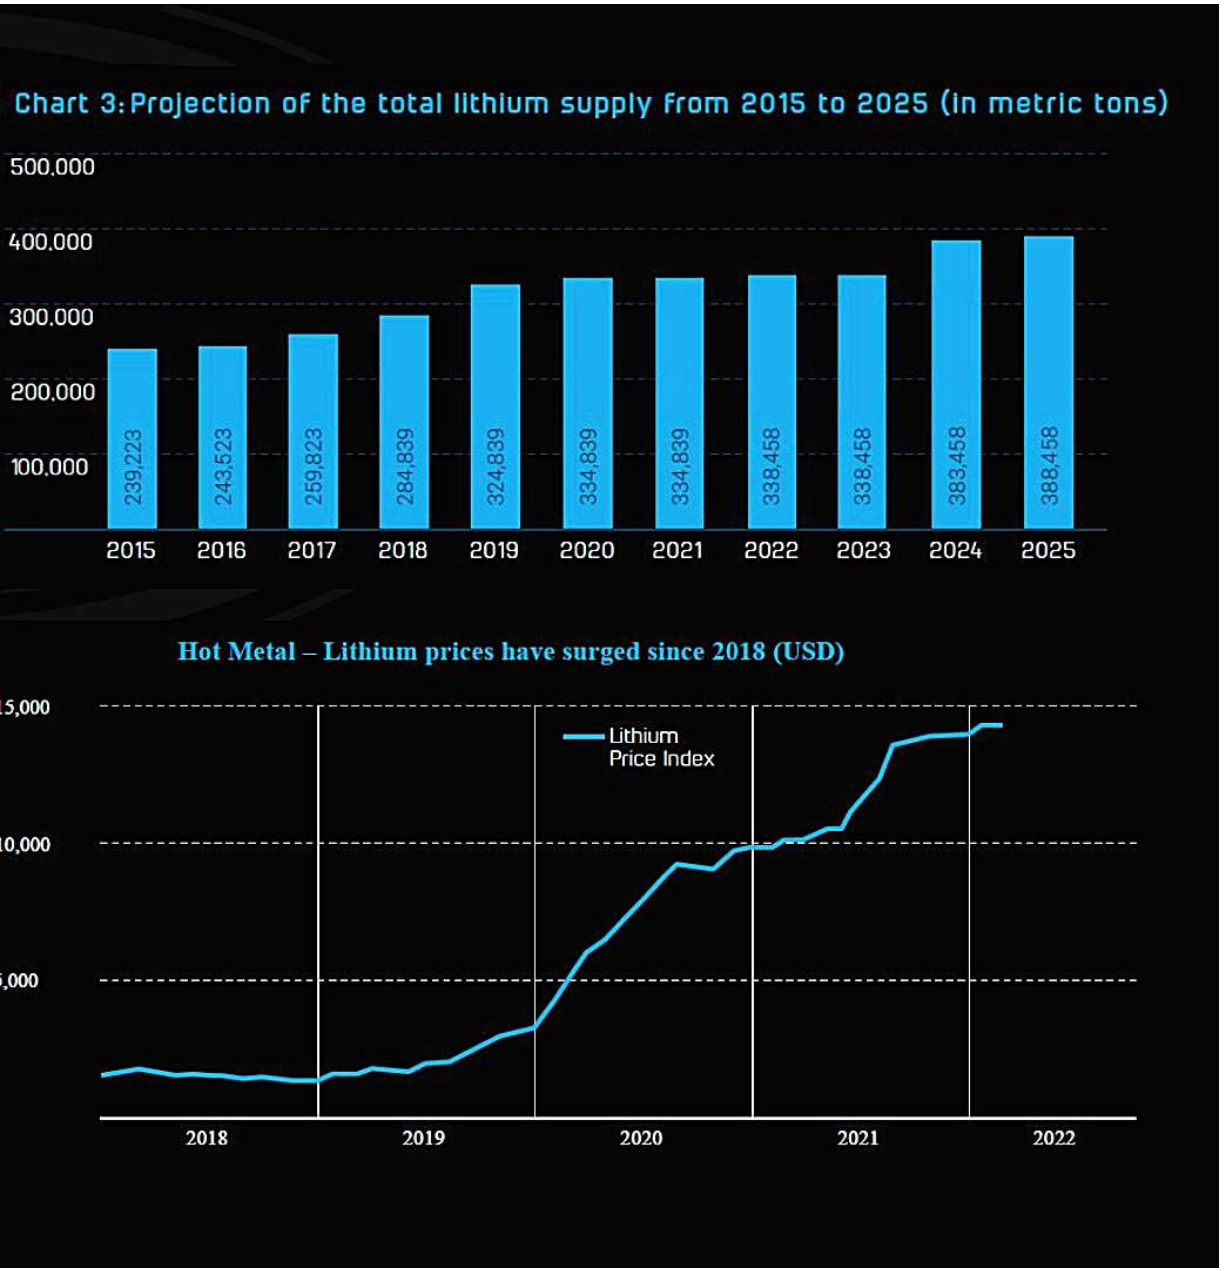
HIGH DEMAND ON A SCARCE PRODUCT

To tackle the shortage of lithium on the market, many companies that use batteries have started to invest in mining operations to speed up the production process. This shows that there is immense pressure to produce much more lithium, and there is a great opportunity right in front of us. With the demand described above and with limited supply, the battery-grade lithium carbonate prices have 400% in the last few months, rising as high as $13,800 per ton. In recent years, the use of lithium for battery production, especially in the automotive industry, has substantially increased compared to the use of lithium for other means.

WHAT IS LITHIUM ?

ELEMENT INFORMATION

Lithium is a soft, silvery-white alkali metal. It is the lightest metal and the lightest solid element on earth having the lowest density factor. It is highly reactive and flammable. Lithium metal is isolated electrolytically from a mixture of lithium chloride and potassium chloride. Due to its volatile nature, it is stored as lithium carbonate. We refer to it as lithium. However, the chemical-specific specification is lithium carbonate - or any other form best suited for storage, processing or transportation.



WHAT IS LITHIUM?

USAGE

Lithium runs our everyday life, even if we are not yet completely aware of it. It is typically found in rechargeable batteries for mobile phones, laptops, digital cameras, and electric vehicles. It is also used in non-rechargeable batteries for heart pacemakers, toys, and clocks. Lithium can store the most energy in the smallest amount of space, allowing it to be utilized all different types of small electronics. Unfortunately, these batteries also have a life span and have to be replaced regularly. It can also be found in different alloys with magnesium and aluminum.

When in an alloy it can be used for armor plating, bicycle frames, high-speed trains, and aircrafts. As seen in chart (1), the numbers are increasing in almost every aspect of this metal. Apart from the above, we can also find lithium in the medical sector and the glass industry. In the form of an oxide, it is used in the production of special glasses and glass ceramics. As lithium carbonate, it is used in the treatments of manic depression and bipolar disorder.1 As we can see, many industries participate in the consumption of lithium.

INVESTMENT VALUE

THE GLOBAL LITHIUM-ION BATTERY MARKET WILL BE RISING TO MORE THAN 75 BN USD BY 2025.

For more than one hundred years, the demand for lithium has continued to grow. From chemical industry to the emergence of new energy vehicles, these are driving the growth of lithium production capacity and price, and it was even considered the "new petroleum". In addition, according to expert analysis, it is estimated that in the next 10 years, the price of lithium will rise by 300% to meet market demand. Among them, the main renewable resources (wind and solar energy) must use lithium carbonate batteries to store and accumulate energy. According to the China Everbright Securities' in-depth study report on the lithium industry in May 2021, the current trend of new energy vehicles doubles the demand for lithium mines. Driven by environmental protection policies and market costs, the demand for lithium carbonate in 2025 will be 3.6 times the current demand. , And the prices of raw materials will inevitably continue to rise.

The benefits of Cryptocurrency

Benefits

- supply chain management / transparency

blockchain can be used to track the movement of goods, their origin, quantity, and quality, which contributes to transparency. It offers an immutable record of all transactions.

- Smart contracts

with smart contracts we can speed up the process of transactions by the automatization of many processes. This saves time and money for the companies and everyday users that carry out transactions.

- peer-to-peer global transactions

fast, secure, and cheap transfers of funds worldwide.

- Enhanced security

because transactions must be agreed upon before being recorded, it is a more secure system than a regular record-keeping system. It also changes how data is stored and accessed.

- Reduced transaction costs

this system eliminates third-party intermediaries when carrying out transactions and exchanges..

- Mobility of assets

assigning cryptocurrency tokens to real-world assets helps to enhance the currently lacking liquidity of such assets.

- Irreversible

blockchain transactions are permanent, so there is no way to change them.

Why Litherium?

THE POPULARITY OF DIGITAL CURRENCY HAS PROVIDED MANY INVESTMENT USERS WITH A NEW WAY OF INVESTMENT AND FINANCIAL MANAGEMENT, BUT MANY PEOPLE DO NOT EVEN UNDERSTAND WHAT DIGITAL CURRENCY IS, AND THEY WILL INEVITABLY WORRY ABOUT WHETHER DIGITAL CURRENCY INVESTMENT IS RELIABLE? IN FACT, THE CORE OF DIGITAL CURRENCY VALUE IS TRANSACTION. THE ESSENCE OF THE BLOCKCHAIN IS A DECENTRALIZED DISTRIBUTED LEDGER, AND THE CORE VALUE OF A DISTRIBUTED LEDGER IS TRANSACTION, WHICH REDUCES TRANSACTION COSTS IN VARIOUS WAYS. OF COURSE, SOME PEOPLE WILL SAY THAT THE CORE VALUE OF BITCOIN AND ALTCOINS IS THAT THERE IS AN INDEPENDENT SUPPLY OF CURRENCY SYSTEMS IN ADDITION TO LEGAL CURRENCIES. HOWEVER, EVERYONE MUST UNDERSTAND THAT FOR DIGITAL CURRENCY TO ENTER THE ROOM, IT MUST BE RECOGNIZED BY MAINSTREAM FINANCIAL MARKET PLAYERS.

SUCH RECOGNITION REQUIRES TWO POINTS: ONE IS TO ESTABLISH AN EXCHANGE RELATIONSHIP WITH LEGAL CURRENCY, AND THE OTHER IS TO SUBVERT THE TRANSACTION PAYMENT FUNCTION OF CERTAIN INDUSTRIES. THE REASON WHY DIGITAL CURRENCY HAS ATTRACTED THE ATTENTION OF MANY FIELDS AROUND THE WORLD IS THAT IT IS CREATING A GLOBALIZED FAST CIRCULATION, AND THE LARGER THE CIRCULATION FIELD, THE WIDER THE SCOPE, THE HIGHER ITS USE VALUE. NOWADAYS, MANY PEOPLE WANT TO MAKE MONEY BY SPECULATING COINS, BUT INVESTMENT IS RISKY. IF INVESTMENT USERS MAKE UP THEIR MINDS TO INVEST IN DIGITAL CURRENCIES, THEN IT IS RECOMMENDED TO CHOOSE MAINSTREAM CURRENCIES. AT PRESENT, THE MAINSTREAM CURRENCY IS GENERALLY REPRESENTED BY BITCOIN. HOWEVER, BITCOIN HAS ACHIEVED HIGH POPULARITY AND THE PRICE IS OVERVALUED, WHICH IS RISKY. SPEAKING OF THE RISKS OF BITCOIN, EVERYONE SHOULD KNOW THAT WHEN A TRANSACTION IS BOTH A CURRENCY, A STOCK, AND A COMMODITY, HOW MUCH ITS PRICE FLUCTUATES AND HOW MUCH RISK EXISTS

Why Litherium?

HOWEVER, IT IS UNDENIABLE THAT BITCOIN HAS INDEED CREATED THE MYTH OF WEALTH, AND IN THE END, VERY FEW PEOPLE ACTUALLY MAKE MONEY FROM BITCOIN. THOSE WHO MAKE QUICK MONEY AND SHORT-TERM SPECULATION CAN HARDLY MAKE MUCH MONEY. THOSE WHO HOLD BITCOIN AND ALLOW IT TO RISE TO ANY PRICE OR FALL TO ANY PRICE WITHOUT THROWING IT WILL REALIZE PROFITS. AND WHY THOSE BIG BOSSES WHO PARTICIPATED IN BITCOIN IN THE EARLY STAGE WERE ABLE TO GET RICH? PERHAPS IT HAS SOMETHING TO DO WITH THEIR BELIEF IN BITCOIN. BITCOIN IS AN OPEN-SOURCE PROGRAM, A CRYPTOGRAPHIC ALGORITHM, A NEW TECHNOLOGY, A P2P ELECTRONIC PAYMENT SYSTEM, AND A GOOD IDEA... THE ORIGINAL INTENTION OF BITCOIN AND BLOCKCHAIN WAS CREATED TO SOLVE PRACTICAL PROBLEMS THROUGH TECHNOLOGY. , TO MAKE HUMAN LIFE MORE EFFICIENT AND CONVENIENT. UP TO NOW, THE ERA OF BLOCKCHAIN HAS ARRIVED, AND THE DIGITAL CURRENCY MARKET IS ALSO DEVELOPING IN A BETTER DIRECTION. BITCOIN WILL EVENTUALLY SUCCESSFULLY COMPLETE ITS MISSION.
ANOTHER ERA IS COMING.
THE LITHERIUM TOKEN LAUNCHED IN JUNE OF THIS YEAR IS A BLOCKCHAIN CRYPTOCURRENCY BACKED BY LITHIUM MINES, AND ITS VALUE WILL BE UNDERWRITTEN BY LITHIUM MINES AT THE SAME PRICE. EVERY LITHERIUM TOKEN BACKED BY LITHIUM ORE WILL BE DEFINED AS THE EQUIVALENT VALUE OF A CERTAIN WEIGHT OF LITHIUM ORE, WHICH MEANS THAT THIS EQUIVALENT EXCHANGE WILL EXIST AS A PHYSICAL MORTGAGE ASSET IN THE AUTHORIZED CUSTODIAN'S RESERVE. DIGITISATION OF LITHIUM MINES THE BIGGEST ADVANTAGE OF THE DIGITAL VERSION OF THE LITHIUM MINE OVER THE PHYSICAL VERSION IS THAT IT CAN BE DIVIDED INTO VERY SMALL UNITS OR AMOUNTS AND TRANSFERRED/TRADED TO THE OTHER PARTY. THE CONCEPT OF LITHERIUM TOKEN IS QUITE EYE-CATCHING. THE GROWING LITHIUM MINING MARKET CAN ALSO DRIVE THE CONTINUOUS GROWTH OF LITHERIUM TOKEN. AT THE SAME TIME, AS INVESTORS ARE CRAZY ABOUT THE CRYPTOCURRENCY MARKET, THE INTRODUCTION OF LARGE AMOUNTS OF FUNDS CAN ALSO EFFECTIVELY DRIVE LITHIUM ORE AND THE APPRECIATION OF LITHERIUM TOKEN. BASED ON THE CONCEPT OF LITHERIUM TOKEN EVEN IF THE CURRENCY DOES NOT MAKE A HUGE WAVE IN THE MARKET, IT CAN STILL GUARANTEE THAT THE CURRENCY IS EQUIVALENT TO THE EQUIVALENT VALUE OF LITHIUM MINE.

Why Litherium?

IN-KIND SUPPORT: LITHERIUM CAN ENSURE THAT EACH TOKEN IS SUPPORTED BY 100G OF LITHIUM CONCENTRATE AND STORED IN THE AUTHORIZED PARTY'S MINING AREA IN WESTERN AUSTRALIA.

REPLACEABILITY: IN THE DEVELOPMENT PROCESS OF LITHERIUM, INVESTORS CAN USE LITHERIUM TO REPLACE LEGAL CURRENCY AT WILL.

PRICE STABILITY: THE LITHERIUM, WHICH REPRESENTS PHYSICAL LITHIUM ORE, PROVIDES CURRENCY HOLDERS WITH A HIGH-QUALITY CREDIT FOUNDATION AND DIVERSIFIES THE HUGE PRICE FLUCTUATIONS THAT OCCUR WHEN THE CRYPTOCURRENCY MARKET HEDGES AGAINST FLUCTUATIONS, AVOIDING THE RISK OF A SHARP DROP IN THE FUNDS OF SMALL INVESTORS.

RELIABILITY: IN ADDITION TO THE SUPPORT, ALL FUNDS IN THE SEED ROUND AND THE INTERNAL SUBSCRIPTION ROUND WILL BE MONITORED BY THE CHIEF FINANCIAL TEAM OF THE AUSTRALIAN REGISTERED THE TRUSTEES OF AUS-FO AUSTRALIA UNIT TRUST AND IT IS GUARANTEED THAT ALL LITHIUM ORE INVENTORIES WILL BE STORED AND CIRCULATED BY LITHERIUM AUSTRALIA MINING GROUP.

IMPLEMENT REVIEW: BEFORE BEING ISSUED TO THE CRYPTOCURRENCY EXCHANGE, ALL SUBSCRIBED LITHERIUM TOKENS AND LITHIUM ORE QUANTITIES CAN BE CHECKED ON THE PERSONAL ACCOUNT, COIN WALLET OF THE ISSUER/TRUSTEE AT ANY TIME.

THE GROUP WILL USE PROFITABLE FUNDS TO ACQUIRE A LITHIUM BATTERY MANUFACTURER TO MAKE PLANS FOR THE FUTURE OF LITHERIUM TOKEN.

TOKENOMICS

Invest in the Future of the World's Energy Storage

TOKEN PRODUCED	100,000,000 UNITS
SEED ROUND ISSUED	20,000,000 UNITS
PRICE PER COIN:	US$0.03
PER COIN EQUIVALENT	100 GRAMS LITHIUM
SEED FUND GOAL	US$700,000.00
HEADQUARTERS:	WESTERN AUSTRALIA

*Current international lithium price referenc
per 100 grams = $0.13 USD

LITHERIUM

LITHERIUM

Litherium has entered a partnership with Ethereum in April 2021 in order to create the most technologically advanced, secure, and operationally efficient coin on the market today. Ethereum is providing several innovative technologies and strategies designed to elevate our coin.

LITHIUM BANK

THE LIQUIDITY OF THE CURRENCY WILL BE THE DIRECTION OF LITHERIUM'S FUTURE DEVELOPMENT. ACCORDING TO RESEARCH, THERE IS A STRONG POSITIVE CORRELATION BETWEEN THE LIQUIDITY OF ELECTRONIC MONEY AND THE MARKET VALUE. AT PRESENT, ALL THE TOP 10 VIRTUAL CURRENCIES IN THE ELECTRONIC MONEY MARKET HAVE GREAT LIQUIDITY. FOR EXAMPLE, BTC CAN BE USED TO PAY FOR MANY ONLINE SHOPPING PLATFORMS, AND ETH CAN BE USED TO PAY FOR MANY ONLINE SHOPPING PLATFORMS. USED AS FUEL FOR ETHEREUM WORKSHOP, ETC. THEREFORE, THE PRIMARY PURPOSE OF LITHERIUM IS TO BECOME ONE OF THE "STABLE COINS", GIVING IT LEGAL AND EXTENSIVE LIQUIDITY. IN ORDER TO ACHIEVE THIS GOAL, WE WILL REGISTER AS A SERVICE E-BANK-LITHIUM BANK AFTER LITHERIUM LOGS ON TO THE MARKET. THE USER’S LITHERIUM CAN BE CONVERTED INTO LEGAL TENDER THROUGH REAL-TIME EXCHANGE RATES AND USED DIRECTLY ON ALL EPOS IN AUSTRALIA. LITHERIUM BANK WILL PROVIDE CUSTOMERS WITH CONVENIENT PAYMENT SERVICES THROUGH THE CREDIT MODEL AND DEDUCT THE LITHERIUM TOKEN FROM THE USER'S ACCOUNT AFTER CONSUMPTION. WITH THE EQUIVALENT OF THE MARKET VALUE LITHIUM MINE AS THE BACKING, LITHERIUM CAN REALIZE THE INSTANT EXCHANGE OF VIRTUAL CURRENCY AND LEGAL CURRENCY UNDER THE CONDITION OF STABLE PRICE, WHICH SOLVES THE BIGGEST PAIN POINT OF THE CURRENT CRYPTOCURRENCY WITHOUT ACTUAL VALUE.

Our Team & Associate

Litherium Australia Mining Pty Ltd

Western Australia Based

> Litherium Australia Mining Pty Ltd is an exclusive company established in Western Australia, it core activity is to match and merge investors for lithium miners

Financial Forecasts

ACCORDING TO THE INVESTMENT STRATEGY PLANNED BY OUR FINANCIAL ANALYSIS TEAM, WE PROMISE TO DISTRIBUTE 50% OF THE PROFIT OBTAINED BY THE INVESTMENT FUND BEFORE THE BACKGROUND ROTATION PERIOD. BEFORE OPENING THE PUBLIC TRADING MARKET, WE ARE CONFIDENT THAT OUR SEED ROUND INVESTORS CAN GET MORE THAN THE PRINCIPAL AMOUNT. THE REMAINING 40% WILL BE REINVESTED IN THE ISSUANCE COST OF LITHERIUM TOKEN, AND 10% WILL BE THE COMMISSION OF ALL CONSTRUCTION TEAMS AND SALES TEAMS. IT IS EXPECTED THAT SEED INVESTORS WILL ACHIEVE THE LOWEST RETURN RATE OF 433% AFTER LAUNCHING TO THE MARKET.

Litherium Launching Schedule Plan

Seed Fund

The issuance cost
Per LITH Token is US$0.03

The seed round will be issued in mid-June with 20 million Litherium at a price of US$0.03 each

For every 400,000 LITH Token sold, the price will increase by US$0.001

Pre-Subscription Phases

Pre-Subscription round will be issued in October, with 20 million pieces being issued. The price is US$0.08 each

For every 400,000 Litherium sold, the price increases by US$0.01

Official-Subscription Phases

Official-Subscription round (back-end round) (1-3 months is variable) will be back-office subscription before the issuance, the price is US$0.13 each
40 million pieces will be issued to the main stream crypto trading platforms on January 1, 2022, at a price of US$0.13 each

Backed Price Calculation

Founding group initially will maintain 2 Millions ASX lithium based listed company shares of lithium for our token price control.

Our price is based on the international lithium concentrate market.

Each Litherium represents 100g lithium concentrate.

According to the current lithium concentrate market, we calculate the market price of each Litherium. It will be US$0.13.

Seed Fund & Initial Subscription Notice

During the Litherium initial phases (before November 31, 2021), all funds and currency data will be custody by the 3rd parties trustee account.
Trust users can transfer or trade the Litherium in small amounts at this stage. However, before being issued to the mass trading market, Litherium will be transferred to any e-wallet that supports the Ethereum code, and Litherium investors will start free trading with counterparty currencies from this moment.

Before the end of the token offering, all unsold Litherium will be returned to the group's account, and the proposed price and market price will remain unchanged.

DISCLAIMER

Litherium Tokens do not represent or confer any direct or indirect (e. g. conversion right) equity stake of Litherium MINING or any other ownership right, share or equivalent right, voting right or any right to receive future profit shares, intellectual property rights or any other form of participation in LITHERIUM and its corporate affiliates or any other rights whatsoever, other than the rights set out in this document.

All information contained in this document is made available upon request of interested persons with the understanding that the authors, publishers, distributors, and advisors are not rendering legal, accounting, tax, investment or other professional advice or opinions on specific facts or matters and accordingly assume no liability whatsoever in connection with its use. Any party receiving this publication agrees to itself meticulously check all figures and assumptions presented herein.

In no event shall Litherium and / or its advisors be liable for any direct, indirect, special, incidental or consequential damages arising out of the use of any opinion or information expressly or implicitly contained in this publication.

Elemental lithium or, due to the unstable nature of pure lithium, lithium carbonate or any other chemical compound suitable for storage or further processing – all of these and for the purpose of this document is referred-to as “Lithium”.

All content may be changed without informing parties having received a previous version.

This document does not solicit any investment into Litherium coin, nor does it provide access to such investment. Terms for investment, if possible, in the future, would apply.

This whitepaper is dated 1st June 2021
